

WeCare - Bringing Charitable Contributions into the 21st Century

The expanded presentation that I would like to forward to you (via email) includes much more detail and background information about this project, including a few charts, graphs, tables, my background and more.

Our ultimate goal will be to create our “dream team”, formulate a business plan and present it to our potential Internet partner (such as Google).

I do have ideas on how to approach our Internet partner with a totally win-win result for everyone involved.

We will give them time to review our business plan and give us a thumbs up, thumbs down or a counteroffer on how we can continue as partners. Should they decline, all we will have lost is a little bit of our time.

In this document, I will use “WeCare” as our temporary platform name and “Google” as our ideal Internet partner.

Some of this information may be repetitive when necessary.

Why St. Louis?

- It is important to start by saying that I do not need anything financial (and very little time) from you or any of our “dream team” partners. All intellectual and financial assets will gladly come from a major Internet company (Google).
- I was born and raised in St. Louis. My wife and I are retired and living in Lake of the Ozarks. I am an Air Force (Vietnam) veteran, a successful business owner in St. Louis, a retired data analyst for a major university and someone who has been in the computer industry for more than 50 years. At the bottom of this document is a bit more information about me.
- The original platform that I have been researching and developing (WeCare) over the past few years is complete. Our innovative and simple platform will be the result of combining the creative modifications of a few popular marketing applications, sophisticated database technology, social media, a “dream team” and the power of a major Internet company.
- We are going to convince Google to partner with us and provide all of the intellectual and financial assets needed in to create and manage our platform.
- To reach Google, we need to create a “dream team” of ten high-profile athletes, celebrities and others. When athletes and celebrities get together to support a cause, the result is not just accumulative...the result can be exponential! You understand the power a team can have when working towards a common goal. We are going to show Google our unique platform (nothing quirky or corny), our “dream team” and several other reasons to become involved with us.
- A search for St. Louis athletes involved with charities showed the Dierdorf-Pronger Golf Classic raising funds for The Dan Dierdorf Emergency and Trauma Center. I’m certain there is a heartfelt story as to why the SSM Health Cardinal Glennon Children’s Hospital is important to you. I believe our platform can significantly help this and other charitable passions you may have. As a side note, In 2013 I retired after 14 years as a data analyst for the University of Nevada School of Medicine (UNSOM), Dept. of Surgery. I was hired by Dr. G. Tom Shires, one of the top trauma surgeons of the 20th century (and Chief of Surgery at Parkland Hospital in Dallas when President Kennedy was shot). Much of my work involved providing data and helping Dr. Shires and many of our trauma surgeons create PowerPoint presentations. (I currently golf 4-5 times a week when weather permits.)
- St. Louis is my hometown and involving several athletes with a St. Louis connection would be ideal. Including one (or more) high-profile athlete from each of the major sports would be perfect. In addition to you and Chris Pronger, there is a wealth of current and former St. Louis athletes who would be valuable as “dream team” partners.
 - ✓ Adam Wainwright, Albert Pujols, Yadier Molina, Ozzie Smith and Kurt Warner are just a few with a St. Louis connection who are already involved in charitable activities.
 - ✓ Tiger Woods, Patrick Mahomes II, Michael Jordan, Serena Williams and Jon Bon Jovi are just a few other names who would be valuable “dream team” partners and provide additional national (and international) exposure.
 - ✓ It may also be possible to embrace the power of the NFL and Nike to enhance our platform.
 - ✓ My group would be one of our ten “dream team” partners and benefit exactly the same as everyone else.
- Calculations using moderate numbers in my extended presentation will show that each of our ten “dream team” partners could receive \$20+ million a year in charitable revenue and \$8+ million in non-charitable revenue. These numbers might sound unrealistic and even laughable. In this presentation, you will be able to insert five key numbers of your own to calculate your projected revenue. You might even find that my \$20+/\$8+ million figures are actually very conservative.

Why do we need an original platform that will bring charitable contributions into the 21st century?

- Every week I receive a dozen or more emails from charities who need funding. When I add to that the requests I see or hear via TV, radio and social media; the total number of requests can easily reach several dozen. There are thousands of charities competing for the same limited charitable funds.
- COVID-19, inflation, a possible recession and other reasons out of our control have all affected both the amount of expendable funds we have and where we spend it. Charities are often the first who suffer from our limited funds.
- Many of us are looking for alternative methods to support our charitable passions.
 - ✓ As an Air Force veteran, I wish I could do more to help injured veterans and their families who need our support.
 - ✓ As a cancer survivor and someone who has had too many family members and friends affected by diseases and major injuries, I wish I could do more to support those affected, their families and medical research.
 - ✓ Many athletes, celebrities and large companies have charitable passions.
 - ✓ Athletes (and a big part of the general public) are now aware of concussions, Chronic Traumatic Encephalopathy (CTE) and how they can affect athletes over the years. More funding for CTE research is needed.
 - ✓ Athletes are well aware of other athletes who for a variety of reasons have fallen on hard times and could use additional help.
 - ✓ Virtually everyone has a charitable passion and wishes they could do more.
- The same fundraising activities used 50+ years ago are still being used today. Many of these activities are still valuable and we are not looking to totally replace them. We are looking to add our platform to these activities.
 - ✓ Advanced technology and creative innovations have changed the way we live. Cell phones, GPS guidance, streaming media, bar codes, QR codes, online searches and shopping (Amazon and others) are just a few of the many innovations we depend on and use on a regular basis.
 - ✓ Our innovative and simple platform will be the result of combining the creative modifications (detailed in my expanded presentation) of a few popular marketing applications, sophisticated database technology, social media, a “dream team” and the power of a major Internet company.
- Below are a few basic highlights about our platform.
 - ✓ Our platform will be a simple, original, permanent and “disruptive” (in a good way) solution that will be embraced by more than 20% of qualified consumers, fundraisers, businesses and those who are passionate about their favorite charities and causes.
 - ✓ Our platform will be easily available to everyone regardless of their nationality, financial situation, social status, race, age, gender, religion or political view. Everyone will benefit in a number of ways and have a simple platform to support their charitable passions.
 - ✓ Our platform will also be able to expand internationally.

Why do I need help?

- As stated earlier, it is important to start by saying that I am not looking for anything financial from you or your group.
- What I do need is for someone to review my expanded presentation (available by email) that will detail the basics of my platform, who could be involved, who will benefit and more. Because of a few unique modifications used in my platform, I do not want to disclose those details on this web page.
- I am not an athlete, a celebrity, a millionaire or anyone who would attract the attention of a major Internet company (and that is understandable). All I am is a veteran who believes he can make a difference. My goal is to be a small part of something big. I need that high-profile person or group who can establish a valuable connection with a major Internet company who has the intellectual assets to move forward with this project.
- When athletes and celebrities get together to support a cause, the result is not just accumulative...the result can be exponential! You and your group understands the power a team can have when working towards a common goal.
 - ✓ We are going to create an impressive group of ten high-profile athletes, celebrities, groups and others who already have a passion for charities and causes.
 - ✓ Our ten “dream team” partners will be used to attract our major Internet partner (Google) who would be very happy to become involved with us, provide all of the financial and intellectual assets to make this project a success, and be responsible for the daily activities of the entire platform.

- ✓ You or your group would be an ideal “dream team” partner and help attract our other partners.
- ✓ You or your group would receive significant revenue to use in your important charitable activities and substantial non-charitable revenue to use at your discretion.

Why would a major Internet company such as Google become involved with our project?

- The rivalries of the major Internet companies are just as fierce as any sport or business rivalry. Many have hundreds of billions of dollars to invest in new technology or make major acquisitions.
- The opportunity to partner with a “dream team” of athletes and celebrities in a project that could literally generate several billion dollars a year in charitable contributions. Google is already involved in extensive charitable work and would receive significant revenue to use for their charitable activities. For their extensive assets in developing and managing our platform, Google would become a 50-50 partner with our “dream team”.
- The databases created by our platform can be used by Google in their advertising activities. In 2001, Google’s entire advertising revenue for the year was less than \$80 million. In 2020 it was \$146.9 billion (more than \$401 million a day).
- The opportunity to create a Groupon-type marketing platform, a GoFundMe-type program, Crowd Funding-type platform, Kickstarter-type platform and many others by using our platform popularity, our databases, our high-profile “dream team” and our simple method to generate funds.

Who will benefit from their involvement with our WeCare platform?

- Thousands of charities will benefit from our unique platform.
- Using moderate numbers, my calculations show that each of our ten “dream team” partners could receive \$20+ million a year in charitable revenue and \$8+ million in non-charitable revenue.
 - ✓ My presentation will include a one-page worksheet that demonstrates how the above revenue figures are calculated. You will be able to insert five key figures of your own choosing to calculate the potential total revenue for the entire concept and the projected revenue our “dream team” members participation. You may find my figures are actually very conservative.
- Our major Internet partner (Google) could receive \$200+ million a year in revenue to use for their charitable passions and \$80+ million in non-charitable revenue.
- Those affected by a disaster or life-changing misfortune. Many charities, causes and individuals need our help when we have an unexpected natural disaster (pandemic, tornado, hurricane, earthquake, tsunami, fire, etc.) or man-made disaster (shooting or accidents causing major injuries, deaths, or damages).
 - ✓ We do not know what type, when or where the next disaster is going to happen. What we do know is that they are going to happen and when they do, we need a more efficient way to generate charitable revenue and distribute it quicker. An important element of our platform will be activated when a disaster occurs.
 - ✓ We are not looking to replace government assistance; just augment and important help where needed.
- Many schools and government organizations are devastated when voters refuse to support important tax initiatives. Our platform will allow these organizations a simple method to generate much-needed revenue.
- There are many environmental and social issues that need to be addressed in the U.S. and all over the world. Our platform will provide a method to generate funds needed to support these programs.

Summarizing: Creating our platform will be as easy as 1-2-3.

Step 1: Create a unique, but simple concept that will be embraced by more than 20% of qualified consumers, fundraisers, businesses and those who are passionate about their favorite charities and causes.

- **Step 1** is complete. Modern technology, social media and the creative modifications of a few popular marketing programs will be the backbone of our platform.

Step 2: Create an impressive group (our “dream team”) of ten high-profile athletes, celebrities and others who already have charitable passions. My group will be one of the ten and benefit exactly the same as others.

- Your experience as an athlete, broadcaster and other business ventures makes you very aware of the value of a team.
- No financial involvement (and very little time) will be needed from our “dream team”.
- Our “dream team” partners will all receive significant charitable and non-charitable revenue for their involvement.
- Our “dream team” will be a valuable asset in attracting our major Internet partner and for initial promotional activities.
- Dan Dierdorf, Chris Pronger and other high-profile athletes with a St. Louis connection would be invaluable “dream team” partners.

Step 3: Partner with a major Internet company (such as Google).

- The rivalries of the major Internet companies are just as fierce as any sport or business rivalry.
- Many have hundreds of billions of dollars to invest in new technology or make major acquisitions.
- Many, including Google, are already involved in significant charitable activities.
- With the help of our “dream team”, we are going to partner with a major Internet company who will:
 - ❖ Provide all financial and intellectual assets to make this project a success.
 - ❖ Be responsible for all daily management activities, including the receiving and disbursing of all funds.
 - ❖ Receive significant charitable and non-charitable revenue.
 - ❖ Share in additional non-charitable revenue streams created by the technology we create and our goodwill.

Who is Bill Brown?

- 1948: Born (and raised) in St. Louis, MO.
- 1966-1970: Air Force (Vietnam) veteran. Worked on radar navigations systems on fighters, bombers and tankers.
- 1970-1976: Repaired million dollar computer systems for Honeywell Information Systems and Raytheon Data Systems.
- 1976-1987: On a dare and a \$10,000 loan, I started my own computer company (based in St. Louis) that included buying, selling and repairing Honeywell computers. At my peak I had more than 30 Honeywell systems under contract in 12 states. My contracts in St. Louis included the midwest regional U.S. Post office facility on Market St., United Missouri Bank, Pevely Dairy, Clayton Brokerage, Missouri Portland Cement and more.
- 1988-1998: I moved to Las Vegas in 1988 and used my computer background to work in various media markets. This included four years as production supervisor for SportsFan Radio Network, one of the first national sports radio networks. Our radio talent included Pete Rose, Bob Golic, Sean Salisbury, Tim Ryan, James Brown and Phil Esposito.
- 1998-2013: In 2013 I retired after 14 years as a data analyst for the University of Nevada School of Medicine (UNSOM), Dept. of Surgery. My title the last five years was Project Director for the Center for Traffic Safety Research. During this time I was involved in many research projects that often required external funding. Obtaining these funds was often time consuming and difficult. I knew there had to be a better way to generate funding. My research started years after retirement.
- 2015: My wife and I (also retired from UNSOM) moved to Lake Ozark, MO to be closer to family and friends in the St. Louis area. Lake Ozark is approximately a three hour drive from St. Louis.
 - ✓ My current activities would show that I golf 4-5 times when weather allows and occasionally fish off of our dock at Lake of the Ozarks. I have played recreational sports my entire adult life and do like to stay active.
 - ✓ Until COVID-19 slowed us down, my wife and I traveled often. We have had a timeshare in Cabo San Lucas since 2007, cruised almost every year since 2005, traveled to Europe and spend a month in Florida during the winter.

My expanded presentation:

- **The first 20 minutes** will begin with two important questions.
 - ✓ **Question #1 - Will consumers participate** in our WeCare program?
 - You will quickly understand the **unique details of our platform**, why it will attract a high percentage of consumers and your estimate of what percentage will become involved.
 - ✓ **Question #2 - Will WeCare generate enough revenue** to benefit everyone involved?
 - **Simple calculations** will detail the potential revenue and how it will be distributed. A one page worksheet will demonstrate how my projected revenue figures were calculated. You will be able to insert five key figures of your own choosing to calculate your projected revenue.
- **The remainder** of this presentation will include much more detail and background information about this project, including a few charts, graphs, tables, my background and more.

Thank you for your valuable time and consideration.

Bill Brown
